

This single pipe system is suitable for shore to cage site or for land based farms. The mixing and bathing is automatically completed for each delivery point in conjunction with a control PC loaded with a software package which not only controls the mechanics of the system but will auto clean, deliver specific feed quantities and mixes to designated points on the system log all feeds, monitor levels and calculate the complete feed regime.

All systems are custom designed to suit each customers needs, for more information please contact [Aqua@rriuk.com](mailto:Aqua@rriuk.com).
